PROFESSIONAL SUMMARY

Cloud Engineer with 3 years of experience at HCLTech, transitioning into DevOps. Skilled in Docker, Kubernetes, Azure, AWS, CI/CD, and Infrastructure as Code and holds multiple Microsoft and GitHub certifications. Experienced in automation, deployment, and cloud operations with a strong focus on scalability and reliability.

SKILLS

Cloud: Azure (VNETs, VMs, ASG, NSG, VMSS, RBAC), AWS (EC2, S3, VPC, EKS)

Software Tools: Docker, Kubernetes, Helm, Ansible, KIND, Ingress, Networking, Linux, Prometheus, Grafana

IaC: Terraform

Scripting: Bash, Python

CI/CD: GitHub Actions, Git, GitHub, Reusable Modules, Hooks

CERTIFICATIONS

AZ-104 | AZ-900 | AZ-500 | SC-900 | AI-900 | GH-900 | GH-200

EXPERIENCE

Analyst – Cloud Operations | HCLTech (2021 – 2024)

- Supported IAM operations using on-prem AD, OKTA, PingID, and Azure Entra ID
- Monitored systems to ensure high availability and performance using Azure Monitor, Datadog
- Assisted in cloud deployments and configurations
- Resolved incidents and requests within SLA using ServiceNow
- Contributed to the knowledge base and built new articles on application troubleshooting

PROJECTS

Notes App (Django/React) | AWS · Terraform · Ansible · Docker Compose · Kubernetes

- Provisioned AWS EC2 infrastructure with Terraform and automated server setup using Ansible playbooks
- Deployed containerized Django + React + MySQL stack via Docker Compose with persistent storage and observability using Prometheus, Grafana, cAdvisor, and Node Exporter
- Built Kubernetes setup on KIND with deployments, PV/PVC storage, and HPA autoscaling; scaled application to 10 pods with zero downtime under load

WanderLustAI – Open Source Contributor

- Containerized a Node.js + MongoDB application using Docker and Docker Compose, improving scalability and environment consistency
- Integrated Ollama TinyLlama model to enable AI-powered travel recommendations and chatbot for general queries, enhancing user experience
- Optimized Express routes and MongoDB queries, reducing API response time by 30%, and collaborated via GitHub (PRs, issues, code reviews)

DevSecOps with GitHub Actions

- Built automated CI/CD pipelines using GitHub Actions, reducing deployment time by 70%
- Integrated 6 security tools (Bandit, Gitleaks, Trivy, Hadolint, dependency scanning, Pytest) enabling shift-left vulnerability detection
- Used Docker and Docker Compose to build images with unique SHA tags and push to Docker Hub for immutable, traceable deployments
- Prevented 15+ security vulnerabilities from reaching production

EDUCATION

Bachelor of Arts (BA) – Lucknow University | 2021
